

Full Stack SDE Positions

About Jochi

UPenn President's Innovation Prize, Draper Bridge Fund, Startup Challenge AI, Launch, and Audience Choice Award Recipients

Jochi is a B2B EdTech startup that enables secondary schools in the US to effectively identify and support students with learning differences. In equipping schools with our integrated platform, we simplify everyday academic management for students with LD while enhancing support their educators provide - equipped with data

This summer, we're seeking to accelerate our plans with a team of driven Full-Stack SDE interns. You'll be integral in enhancing Jochi's frontend and backend for our anticipated Fall 2024 relaunch with over 1,000 users. Offering competitive pay and potential for full-time return or part-time engagement upon return to school.

Key Responsibilities and Qualifications

- Develop and enhance Jochi's web application using Node.js, Vue, JavaScript, MySQL, and Next.js.
- Manage MySQL databases and optimize querying for user data.
- Deploy and manage applications on AWS cloud services.
- Collaborate with product & design teams in agile sprints.

- Pursuing a bachelor's, master's, or PhD degree in Computer Science
- Robust software development experience or notable projects
- Proficiency in HTML, CSS, JavaScript, and Vue.js for frontend development, Node.js, Express, MySQL for backend development and AWS.
- Strong problem-solving skills in a fast-paced environment

5 spots available, in-person Philadelphia based, with mid-June start.

To apply, email your resume and any past projects to contact@jochi.info, subject: "Full Name" + "SDE 24' Intern"
